TOXICOLOGY

www.elsevier.com/locate/toxicol

Subject index of volume 189

Acetaminophen; Renal pathology; Nitric oxide; Mice **189**, 173

Adult respiratory distress syndrome (ARDS); Impulse noise; Blast overpressure; Terrorist bombings; Mines; Antioxidants; Oxidative stress; Nitric oxide **189**, 63

Alpha-tocopherol; Vitamin E; Vitamin E succinate; Mitochondria; Parkinson's disease; Oxidative stress; Environment **189**, 129

Antioxidant nutrients; Mongolian gerbil; SHRSP; Delayed neuronal death **189**, 55

Antioxidants; Carbon tetrachloride; Lipid peroxidation; Oxidative stress; Inflammation; Free radicals; Cyclooxygenases; Isoprostanes; Prostaglandins; Hepatotoxin **189**, 113

Antioxidants; Exercise; Oxidative stress **189**, 41

Antioxidants; Impulse noise; Blast overpressure; Terrorist bombings; Mines; Oxidative stress; Nitric oxide; Adult respiratory distress syndrome (ARDS) **189**, 63

Antioxidants; Ionizing radiation; Radioprotectors; Therapeutics; Vitamins; Phytochemicals **189**, 1

Antioxidant therapy; Lipid peroxidation; Burn trauma; Antioxidant vitamins; Cytokine synthesis in burn injury; Myocardial dysfunction in burn injury **189**, 75

Antioxidant vitamins; Lipid peroxidation; Burn trauma; Antioxidant therapy; Cytokine synthesis in burn injury; Myocardial dysfunction in burn injury **189**, 75

Apoptosis; JP-8 jet fuel; Jurkat cells; cDNA expression array; Oxidative stress; Gene-specific reverse transcription polymerase chain reaction **189**, 181

Arsenic; Free cytoplasmic calcium; Mitogen-induced T cell proliferation; Phytohemmagglutinin; Concanavalin A; Arsenic immunotoxicity **189**, 235

Arsenic immunotoxicity; Arsenic; Free cytoplasmic calcium; Mitogen-induced T cell proliferation; Phytohemmagglutinin; Concanavalin A **189**, 235

Ascorbic acid; Copper; Oxidative stress; Vitamin E **189**, 147

Bioavailability; Protein binding; In vitro–in vivo extrapolation; Cytotoxic potency; Lipophilicity; MEIC **189**, 211

Biochemistry; Cypermethrin; Isoflavones; Rabbit; Hematology **189**, 223

Blast overpressure; Impulse noise; Terrorist bombings; Mines; Antioxidants; Oxidative stress; Nitric oxide; Adult respiratory distress syndrome (ARDS) **189**, 63

Burn trauma; Lipid peroxidation; Antioxidant therapy; Antioxidant vitamins; Cytokine synthesis in burn injury; Myocardial dysfunction in burn injury **189**, 75

Carbon tetrachloride; Lipid peroxidation; Oxidative stress; Inflammation; Free radicals; Cyclooxygenases; Isoprostanes; Prostaglandins; Antioxidants; Hepatotoxin **189**, 113

cDNA expression array; JP-8 jet fuel; Jurkat cells; Oxidative stress; Apoptosis; Gene-specific reverse transcription polymerase chain reaction **189**, 181

Chemiluminescence; Plant phenolics; DNA adducts; 7,12-Dimethylbenz[*a*]anthracene; Human neutrophils **189**, 199

Concanavalin A; Arsenic; Free cytoplasmic calcium; Mitogen-induced T cell proliferation; Phytohemmagglutinin; Arsenic immunotoxicity **189**, 235

Copper; Oxidative stress; Vitamin E; Ascorbic acid **189**, 147

Cyclooxygenases; Carbon tetrachloride; Lipid peroxidation; Oxidative stress; Inflammation; Free radicals; Isoprostanes; Prostaglandins; Antioxidants; Hepatotoxin **189**, 113

Cyclosporine A; Reactive oxygen species; Thromboxane; Free radicals; Eicosanoids; Lipid peroxidation; Vitamin E; Thiobarbituric acid reactive substances (TBARS) **189**, 99

Cypermethrin; Isoflavones; Rabbit; Hematology; Biochemistry **189**, 223

PII: S0300-483X(03)00236-1

Cytokine synthesis in burn injury; Lipid peroxidation; Burn trauma; Antioxidant therapy; Antioxidant vitamins; Myocardial dysfunction in burn injury **189**, 75

Cytotoxic potency; Protein binding; In vitro–in vivo extrapolation; Lipophilicity; Bioavailability; MEIC **189**, 211

Delayed neuronal death; Mongolian gerbil; SHRSP; Antioxidant nutrients **189**, 55

7,12-Dimethylbenz[*a*]anthracene; Plant phenolics; DNA adducts; Chemiluminescence; Human neutrophils **189**, 199

DNA adducts; Plant phenolics; 7,12-Dimethylbenz[*a*]anthracene; Chemiluminescence; Human neutrophils **189**, 199

DNA damage; Ultraviolet light (UV); DNA repair; Reactive oxygen species (ROS); Nucleotide excision repair (NER); Transcription-coupled repair (TCR); UV-apoptosis; Protein kinase C (PKC); Immunosuppression; Olive oil; Prevention; Mutation **189**, 21

DNA repair; Ultraviolet light (UV); DNA damage; Reactive oxygen species (ROS); Nucleotide excision repair (NER); Transcription-coupled repair (TCR); UV-apoptosis; Protein kinase C (PKC); Immunosuppression; Olive oil; Prevention; Mutation **189**, 21

Eicosanoids; Cyclosporine A; Reactive oxygen species; Thromboxane; Free radicals; Lipid peroxidation; Vitamin E; Thiobarbituric acid reactive substances (TBARS) **189**, 99

Environment; Vitamin E; Vitamin E succinate; Alpha-tocopherol; Mitochondria; Parkinson's disease; Oxidative stress **189**, 129

Ethanol; Oxidant injury; Vitamin E; Vitamin C; Melatonin **189**, 89

Exercise; Oxidative stress; Antioxidants **189**, 41

Free cytoplasmic calcium; Arsenic; Mitogen-induced T cell proliferation; Phytohemmagglutinin; Concanavalin A; Arsenic immunotoxicity **189**, 235

Free radicals; Carbon tetrachloride; Lipid peroxidation; Oxidative stress; Inflammation; Cyclooxygenases; Isoprostanes; Prostaglandins; Antioxidants; Hepatotoxin **189**, 113

Free radicals; Cyclosporine A; Reactive oxygen species; Thromboxane; Eicosanoids; Lipid peroxidation; Vitamin E; Thiobarbituric acid reactive substances (TBARS) **189**, 99

Gene-specific reverse transcription polymerase chain reaction; JP-8 jet fuel; Jurkat cells; cDNA expression array; Oxidative stress; Apoptosis **189**, 181

Hematology; Cypermethrin; Isoflavones; Rabbit; Biochemistry **189**, 223

Hepatotoxin; Carbon tetrachloride; Lipid peroxidation; Oxidative stress; Inflammation; Free radicals; Cyclooxygenases; Isoprostanes; Prostaglandins; Antioxidants **189**, 113

Human neutrophils; Plant phenolics; DNA adducts; 7,12-Dimethylbenz[*a*]anthracene; Chemiluminescence **189**, 199

Human; Vitamin K epoxide reductase; Vitamin K; Warfarin; Michaelis–Menten kinetics; Species comparison; In vitro **189**, 191

Immunosuppression; Ultraviolet light (UV); DNA damage; DNA repair; Reactive oxygen species (ROS); Nucleotide excision repair (NER); Transcription-coupled repair (TCR); UV-apoptosis; Protein kinase C (PKC); Olive oil; Prevention; Mutation **189**, 21

Impulse noise; Blast overpressure; Terrorist bombings; Mines; Antioxidants; Oxidative stress; Nitric oxide; Adult respiratory distress syndrome (ARDS) **189**, 63

Inflammation; Carbon tetrachloride; Lipid peroxidation; Oxidative stress; Free radicals; Cyclooxygenases; Isoprostanes; Prostaglandins; Antioxidants; Hepatotoxin **189**, 113

In vitro–in vivo extrapolation; Protein binding; Cytotoxic potency; Lipophilicity; Bioavailability; MEIC **189**, 211

In vitro; Vitamin K epoxide reductase; Vitamin K; Warfarin; Michaelis–Menten kinetics; Species comparison; Human **189**, 191

Ionizing radiation; Radioprotectors; Therapeutics; Antioxidants; Vitamins; Phytochemicals **189**, 1

Isoflavones; Cypermethrin; Rabbit; Hematology; Biochemistry **189**, 223

Isoprostanes; Carbon tetrachloride; Lipid peroxidation; Oxidative stress; Inflammation; Free radicals; Cyclooxygenases; Prostaglandins; Antioxidants; Hepatotoxin **189**, 113

JP-8 jet fuel; Jurkat cells; cDNA expression array; Oxidative stress; Apoptosis; Gene-specific reverse transcription polymerase chain reaction **189**, 181

Jurkat cells; JP-8 jet fuel; cDNA expression array; Oxidative stress; Apoptosis; Gene-specific reverse transcription polymerase chain reaction **189**, 181

Lipid peroxidation; Burn trauma; Antioxidant therapy; Antioxidant vitamins; Cytokine synthesis in burn injury; Myocardial dysfunction in burn injury **189**, 75

Lipid peroxidation; Carbon tetrachloride; Oxidative stress; Inflammation; Free radicals; Cyclooxygenases; Isoprostanes; Prostaglandins; Antioxidants; Hepatotoxin **189**, 113

Lipid peroxidation; Cyclosporine A; Reactive oxygen species; Thromboxane; Free radicals; Eicosanoids; Vitamin E; Thiobarbituric acid reactive substances (TBARS) **189**, 99

Lipophilicity; Protein binding; In vitro–in vivo extrapolation; Cytotoxic potency; Bioavailability; MEIC **189**, 211

MEIC; Protein binding; In vitro–in vivo extrapolation; Cytotoxic potency; Lipophilicity; Bioavailability **189**, 211

Melatonin; Ethanol; Oxidant injury; Vitamin E; Vitamin C **189**, 89

Mice; Acetaminophen; Renal pathology; Nitric oxide **189**, 173

Michaelis–Menten kinetics; Vitamin K epoxide reductase; Vitamin K; Warfarin; Species comparison; In vitro; Human **189**, 191

Mines; Impulse noise; Blast overpressure; Terrorist bombings; Antioxidants; Oxidative stress; Nitric oxide; Adult respiratory distress syndrome (ARDS) **189**, 63

Mitochondria; Vitamin E; Vitamin E succinate; Alpha-tocopherol; Parkinson's disease; Oxidative stress; Environment **189**, 129

Mitogen-induced T cell proliferation; Arsenic; Free cytoplasmic calcium; Phytohemmagglutinin; Concanavalin A; Arsenic immunotoxicity **189**, 235

Mongolian gerbil; SHRSP; Delayed neuronal death; Antioxidant nutrients **189**, 55

Mutation; Ultraviolet light (UV); DNA damage; DNA repair; Reactive oxygen species (ROS); Nucleotide excision repair (NER); Transcription-coupled repair (TCR); UV-apoptosis; Protein kinase C (PKC); Immunosuppression; Olive oil; Prevention **189**, 21

Myocardial dysfunction in burn injury; Lipid peroxidation; Burn trauma; Antioxidant therapy; Antioxidant vitamins; Cytokine synthesis in burn injury **189**, 75

Nitric oxide; Acetaminophen; Renal pathology; Mice **189**, 173

Nitric oxide; Impulse noise; Blast overpressure; Terrorist bombings; Mines; Antioxidants; Oxidative stress; Adult respiratory distress syndrome (ARDS) **189**, 63

Nucleotide excision repair (NER); Ultraviolet light (UV); DNA damage; DNA repair; Reactive oxygen species (ROS); Transcription-coupled repair (TCR); UV-apoptosis; Protein kinase C (PKC); Immunosuppression; Olive oil; Prevention; Mutation **189**, 21

Olive oil; Ultraviolet light (UV); DNA damage; DNA repair; Reactive oxygen species (ROS); Nucleotide excision repair (NER); Transcription-coupled repair (TCR); UV-apoptosis; Protein kinase C (PKC); Immunosuppression; Prevention; Mutation **189**, 21

Oxidant injury; Ethanol; Vitamin E; Vitamin C; Melatonin **189**, 89

Oxidative stress; Carbon tetrachloride; Lipid peroxidation; Inflammation; Free radicals; Cyclooxygenases; Isoprostanes; Prostaglandins; Antioxidants; Hepatotoxin **189**, 113

Oxidative stress; Copper; Vitamin E; Ascorbic acid **189**, 147

Oxidative stress; Exercise; Antioxidants **189**, 41

Oxidative stress; Impulse noise; Blast overpressure; Terrorist bombings; Mines; Antioxidants; Nitric oxide; Adult respiratory distress syndrome (ARDS) **189**, 63

Oxidative stress; JP-8 jet fuel; Jurkat cells; cDNA expression array; Apoptosis; Gene-specific reverse transcription polymerase chain reaction **189**, 181

Oxidative stress; Vitamin E; Vitamin E succinate; Alpha-tocopherol; Mitochondria; Parkinson's disease; Environment **189**, 129

Parkinson's disease; Vitamin E; Vitamin E succinate; Alpha-tocopherol; Mitochondria; Oxidative stress; Environment **189**, 129

Phytochemicals; Ionizing radiation; Radioprotectors; Therapeutics; Antioxidants; Vitamins **189**, 1

Phytohemmagglutinin; Arsenic; Free cytoplasmic calcium; Mitogen-induced T cell proliferation; Concanavalin A; Arsenic immunotoxicity **189**, 235

Plant phenolics; DNA adducts; 7,12-Dimethylbenz[*a*]anthracene; Chemiluminescence; Human neutrophils **189**, 199

Prevention; Ultraviolet light (UV); DNA damage; DNA repair; Reactive oxygen species (ROS); Nucleotide excision repair (NER); Transcription-coupled repair (TCR); UV-apoptosis; Protein kinase C (PKC); Immunosuppression; Olive oil; Mutation **189**, 21

Prostaglandins; Carbon tetrachloride; Lipid peroxidation; Oxidative stress; Inflammation; Free radicals; Cyclooxygenases; Isoprostanes; Antioxidants; Hepatotoxin **189**, 113

Protein binding; In vitro–in vivo extrapolation; Cytotoxic potency; Lipophilicity; Bioavailability; MEIC **189**, 211

Protein kinase C (PKC); Ultraviolet light (UV); DNA damage; DNA repair; Reactive oxygen species (ROS); Nucleotide excision repair (NER); Transcription-coupled repair (TCR); UV-

apoptosis; Immunosuppression; Olive oil; Prevention; Mutation **189**, 21

Rabbit; Cypermethrin; Isoflavones; Hematology; Biochemistry **189**, 223

Radioprotectors; Ionizing radiation; Therapeutics; Antioxidants; Vitamins; Phytochemicals **189**, 1

Reactive oxygen species; Cyclosporine A; Thromboxane; Free radicals; Eicosanoids; Lipid peroxidation; Vitamin E; Thiobarbituric acid reactive substances (TBARS) **189**, 99

Reactive oxygen species (ROS); Ultraviolet light (UV); DNA damage; DNA repair; Nucleotide excision repair (NER); Transcription-coupled repair (TCR); UV-apoptosis; Protein kinase C (PKC); Immunosuppression; Olive oil; Prevention; Mutation **189**, 21

Renal pathology; Acetaminophen; Nitric oxide; Mice **189**, 173

SHRSP; Mongolian gerbil; Delayed neuronal death; Antioxidant nutrients **189**, 55

Species comparison; Vitamin K epoxide reductase; Vitamin K; Warfarin; Michaelis–Menten kinetics; In vitro; Human **189**, 191

Terrorist bombings; Impulse noise; Blast overpressure; Mines; Antioxidants; Oxidative stress; Nitric oxide; Adult respiratory distress syndrome (ARDS) **189**, 63

Therapeutics; Ionizing radiation; Radioprotectors; Antioxidants; Vitamins; Phytochemicals **189**, 1

Thiobarbituric acid reactive substances (TBARS); Cyclosporine A; Reactive oxygen species; Thromboxane; Free radicals; Eicosanoids; Lipid peroxidation; Vitamin E **189**, 99

Thromboxane; Cyclosporine A; Reactive oxygen species; Free radicals; Eicosanoids; Lipid peroxidation; Vitamin E; Thiobarbituric acid reactive substances (TBARS) **189**, 99

Transcription-coupled repair (TCR); Ultraviolet light (UV); DNA damage; DNA repair; Reactive oxygen species (ROS); Nucleotide excision repair (NER); UV-apoptosis; Protein kinase C (PKC); Immunosuppression; Olive oil; Prevention; Mutation **189**, 21

Ultraviolet light (UV); DNA damage; DNA repair; Reactive oxygen species (ROS); Nucleotide excision repair (NER); Transcription-coupled repair (TCR); UV-apoptosis; Protein kinase C (PKC); Immunosuppression; Olive oil; Prevention; Mutation **189**, 21

UV-apoptosis; Ultraviolet light (UV); DNA damage; DNA repair; Reactive oxygen species (ROS); Nucleotide excision repair (NER); Transcription-coupled repair (TCR); Protein kinase C (PKC); Immunosuppression; Olive oil; Prevention; Mutation **189**, 21

Vitamin C; Ethanol; Oxidant injury; Vitamin E; Melatonin **189**, 89

Vitamin E; Copper; Oxidative stress; Ascorbic acid **189**, 147

Vitamin E; Cyclosporine A; Reactive oxygen species; Thromboxane; Free radicals; Eicosanoids; Lipid peroxidation; Thiobarbituric acid reactive substances (TBARS) **189**, 99

Vitamin E; Ethanol; Oxidant injury; Vitamin C; Melatonin **189**, 89

Vitamin E succinate; Vitamin E; Alpha-tocopherol; Mitochondria; Parkinson's disease; Oxidative stress; Environment **189**, 129

Vitamin E; Vitamin E succinate; Alpha-tocopherol; Mitochondria; Parkinson's disease; Oxidative stress; Environment **189**, 129

Vitamin K epoxide reductase; Vitamin K; Warfarin; Michaelis–Menten kinetics; Species comparison; In vitro; Human **189**, 191

Vitamin K; Vitamin K epoxide reductase; Warfarin; Michaelis–Menten kinetics; Species comparison; In vitro; Human **189**, 191

Vitamins; Ionizing radiation; Radioprotectors; Therapeutics; Antioxidants; Phytochemicals **189**, 1

Warfarin; Vitamin K epoxide reductase; Vitamin K; Michaelis–Menten kinetics; Species comparison; In vitro; Human **189**, 191
